👤 Profile

Frontend Developer with 4+ years of experience in building scalable, responsive, and high-performance web applications using React.js and Next.js. Skilled in JavaScript, TypeScript, state management, and API integration. Proven ability to deliver production-ready features, optimise performance, and collaborate in agile environments. Strong focus on clean code, reusable components, and user experience.

💼 Work Experience

Software Engineer, Gogroup pvt. lmtd 📄 02.2022 – present | Noida, India

- Developed scalable and reusable UI components using React.js and Next.js, improving development efficiency
- Integrated REST and GraphQL APIs, enabling seamless real-time data updates
- Implemented global state management using Zustand, reducing state-related bugs and improving maintainability
- Optimized application performance using lazy loading and code splitting, improving page load time
- Built responsive and accessible UI using Tailwind CSS and Ant Design
- Collaborated in Agile/Scrum environment, participating in sprint planning and code reviews
- Debugged and resolved complex UI issues, improving application stability

🎓 Education

Master of Business Administration, 03.2026 – Present
Sikkim Manipal University 📄

Bachelor of Computer Applications, 07.2022 – 08.2025
Manipal University Jaipur 📄

Full-Stack Web Development, Masai School 📄 07.2021 – 01.2022 | Bangalore, India

Diploma in Computer science and engineering, 09.2017 – 09.2020 | Patna, India
Government Women's Polytechnic, Patna 📄

Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Redux (basic), Zustand, Tailwind CSS

Backend: Node.js, Express.js

Databases: PostgreSQL

APIs: REST APIs, GraphQL (Hasura)

Authentication: JWT, Magic SDK

Tools & Platforms: Git, GitHub, VS Code, Postman

Testing: Playwright (basic)

Concepts: Responsive Design, Performance Optimisation, Code Splitting, Lazy Loading

Projects

Netflix Clone (CineStream)

- Developed a responsive OTT platform UI using React.js
- Implemented user authentication and protected routes
- Built reusable UI components and improved performance using optimized rendering
- Tech Stack: React.js, Material UI, Axios

Weather Application

- Developed a real-time weather app with API integration and dynamic UI updates
- Implemented search functionality with location-based results
- Tech Stack: React.js, Axios

ACHIEVEMENTS

- Delivered multiple production-grade applications with modern frontend architecture
- Improved UI performance and reduced rendering issues through optimized state handling
- Strong debugging and problem-solving skills in real-world applications

ADDITIONAL INFORMATION

- Experience working in Agile teams
- Strong understanding of frontend architecture and design patterns
- Quick learner with adaptability to new technologies
